Bio Pouch Septic Septic Tank Treatment

The initial application of Bio Pouch Septic:

- Restores the natural biological process
- Boosts the existing biological activity

Following with regular monthly applications will:

- Keep your septic tank working effectively
- Prevent expensive emergencies
- Prevent additional pumping costs.

Bio Pouch Septic is safe to use as directed. It is completely natural, containing no corrosive chemicals, caustic or acids, and is hazard free. It will not damage metal, ceramic, or plastic parts of the drainage system.

Easily Maintain your Septic System

When functioning properly, household wastes are collected in your septic tank and then broken down, liquefied, and deodorized. Because this process is biological, it is easily upset and may stop working.

Some common factors that tend to upset the natural process are:

- Overuse of disinfectants
- Overuse of bleaches
- Overuse of detergents
- Very hot or cold conditions.

Such factors kill the micro-organisms that work to keep your septic system running properly. Bio Pouch Septic replenishes and boosts the supply of these valuable micro-organisms and allows natural activity to continue.

Simple and Easy to Use

Using Bio Pouch Septic is simple. Just drop in the convenient pre-packaged, pre-measured pouches into your lavatory bowl. The plastic pouches dissolve away so you don't have to handle the powder. No fuss - no bother - no effort!

Specifications:

Form: Free-flowing granular powder
Color: Blue
Nutrient Content: Biological nutrients & stimulants
Plate Count: 5 billion per gram

Application Instructions:

Septic Tanks

<i>Tank Size</i>	<i>Initial Dosage</i>	<i>Maintenance**</i>
2-3m3 gallon cap.	1 pouch / day for 4 days	1 pouch per month
5-10m3 gallon cap.	2 pouches / day for 4 days	2 pouches per month

** Add as regularly as possible. If it is required to miss one day, add that day's product with the next dosage.

Benefits of Bio Pouch Septic:

- Reduces Frequent Pumping of Septic Tank
- Extends Life of Drain Area
- Controls Methane Production
- Improves Drain Field Percolation
- Keeps Sewer Lines Open
- Neutralizes Detergent Bleach
- Prevents Drain Blockage
- Will Not Attack Plastic or Metal Plumbing
- Safer to Use than Harsh Chemicals
- Degrades Waste Faster
