GET THE LIME OUT

Product Data Sheet

Product Description:

This is a very effective hydrochloric and phosphoric acids based descaler for use in areas where lime, scale build up or iron stains are encountered. It also contains inhibited acids which will not cause corrosion of metals.

Product Data:

Physical state: Liquid

Specific Gravity: 1.20 +/- 0.02

pH: 1.0 +/-0.5

Vapour pressure: 100 mm Hg

Boiling point: Above 100°C

Freezing point: Below 0°C

Solubility in water: 100%

Evaporation rate: no data

Odour and appearance: This product is a tan coloured liquid with a mildly pungent odour.

Directions:

Descaling Dishwashers:

- Use 1L of Get The Lime Out to 8L of water at 60-70 deg. C.
- Circulate solution in machine until scale is dissolved, approx. 20-30 minutes
- Drain and rinse thoroughly
- For glass washers use 20mLs to 1L of water and for scaled glasses use 8mLs to 1L of water
- For descaling coffee pots and urns, fill urn or pot with water and add 30 mLs of Get The Lime Out
