SCALE ZERO

Product Data Sheet

Product Description:

This product is a highly concentrated lime scale and oxide film remover. It is designed for the toughest soils at any concentration. It is an excellent choice for re-circulation cleaning of dish machines as well as general removal of mineral deposits.

Product Data:

pH: 1.00 + - 0.02

Specific Gravity: 1.15 + - 0.02

Colour: Yellow

State: Liquid

Scent: Mild Chemical

Flash Point: N/A

Stability: Highly stable (1 Year)

Storage: Store in a cool dry place

Directions:

- The usage concentration of this product depends on the amount of scale and the method of application.
- **Descaling Dishwashing Machines:**
Use 1L of product to 8 litres of water at 60-70 deg. C. Circulate solution in machine until scale is dissolve (approx. 20-30 minutes).
Drain and rinse machine thoroughly.
- **Glass Washers:**
Use 20 mLs of product per litre of water at 50-60 deg. C. Circulate solution for 15-30 minutes. Scaled glasses can also be cleaned by this method, instead use 6-8 mLs of product per litre of water. Rinse thoroughly after descaling.
